This is a series of books that has received a recommendation from the Brazilian Spiritist Federation, to be considered as a continuation of studies after or alongside the Kardec books.

We call attention to the importance of following this sequence as numbered in the list when reading the books, because it represents a steady line of progress and deepening of knowledge.

For newcomers to this series, we mention that the psychography (or automatic-writing) was all received by Francisco Candido Xavier, commonly called 'Chico', who was Brazil's most prolific medium to date (1910 – 2002).

The spiritual author, by name Andre Luiz, had been a doctor while incarnate. He had no special religious inclinations; he led a normal life and was dedicated to his

profession. However, upon returning to the spiritual world, he found himself in an unpleasant ambient, alone in a dark zone, where he was very unhappy and bewildered.

After an extended period of time, he was rescued from this region and then found himself in Nosso Lar, still not understanding what had happened to his life.

So, we begin to follow his gradual spiritual awakening, which eventually leads him to become a spiritual Teacher. His awakening to the spiritual reality of life after death corresponds to what many unbelievers go through when they leave their physical body.

We have great pleasure in introducing you to this very special series of instructive books, and we invite you to pass on these titles to your friends and family. We feel sure you will come to bless the day you found Andre Luiz.
